Yes don't get me wrong the game is really good but there are a few things that would make the game so much better and if the creators read this please do these things Anyway the good news: the game has amazing graphics, gameplay, and story mode. It comes with a some awesome weapons, clothes, and vehicles. I love the game and I've been playing for a while , and I highly reccomend it to anyone that loves thrill or wants to sit hours on their phone Anyway I thing the game should add an update where you can have a garage for you vehicles , and your clothes , in others words you should be able by a mansion you can actually interact with , I also like the old version where if you killed somebody they would drop a crate or a weapon or a vehicle I highly recommend the makers bring that back. Also it would be sick if you were able to go into the secret base like you can with the military (maybe even put special vehicles in it). They should add a special place on the map for zombies and aliens it would be very fun if you can fight them whenever especially for people that already beat the game . And the last thing is add a bigger map , and add special passageways Thank you for your time please consider this update it the makers are reading this III The game is amazing and it's really good for people who love mission games that you can over and over again replay anytime. The weapons, cars and all are great, especially the story line. But the game would be even better if there were more villains like Frank Velliano. I wish Jason could have some gang members that he could use sometimes to fight in missions. There should be an island Jason owns, one that he can customize with his own cars planes and more just like gangster New Orleans or even better. There could also be a way to have conversations with the city people or something like that and make friends with some of the non-playing characters. I love this game and I hope that the creators can add a few of these suggestions if possible. Also, if there could be a bigger map then that would be cool too. I also think that instead of the cops shooting at us when we commit crimes, they should arrest us so we can bail ourselves out of jail instead of being killed every time. Jason should be able to hang out with Karen sometimes if they are a couple in this story. But please, there has to be more amazing missions. Thank You For Reading, hope you have a great day. I love it. The game I will say does have some problems. For starters, why can you only play as a male(Jason)? It would be really cool to be able to play as another gender. Another thing that really bothers me is the clothing. I wish that you could customize the character to your own taste. Like for example changing to the show style, the pants, you can wear jeans or joggers or something super skinny, or even better, accessories like a watch or sunglasses. Some things that I would also like to see is being able to purchase houses or buildings and be able to actually go in the house. Vehicles customization would also be an amazing addition to the game. You can customize the cars and trucks and planes to make them look anyway you want. Overall the game is really amazing. If Gameloft reads and takes this review into consideration, and adds these ideas which I think players of this game would side with me, I would appreciate it alot. Another thing i dont like abou this new update is how games are adding "battle passes". I would like if there were some form of gamemode to earn xp quicker. But since none of that exists, I dislike the battle passes". I would like if there were some form of gamemode to earn xp quicker.
