Read more...iWorksheets: 3Vocabulary: 4RocksThere are three major groupings of rocks: igneous, metamorphic, and sedimentary. If two particles have similar charges, they repel each other, but, if they have opposite charges, they attract each other. Read more...iWorksheets: 3Study Guides: 1Vocabulary: 5Plate TectonicsThe Earth's layers: crust, mantle, core. Metamorphic rocks: foliated and non-foliated (or massive). Read more...iWorksheets: 5Study Guides: 1Vocabulary: 7Weather patternsAir masses are extensive bodies of air that have similar temperatures and water content throughout. A layer of rock material that can store water and allow the movement of water through the ground is called an aquifer. Read more...iWorksheets: 5Study Guides: 1Vocabulary: 5Introduction to AnimalsScientists have discovered about 1.2 million different species of animals on our planet. The structures within the cell are known as organelles, which are all of the structures within the cell that carry out specific functions. Customer Reviews, including Product Star Ratings help customers to learn more about the product and decide whether it is the right product for them. Fungi include mushrooms, molds, and yeasts. There are six categories of nutrients: carbohydrates, fats, proteins, vitamins, minerals and water. He used photographs to prove that there are galaxies beyond our own. Read more...iWorksheets: 4Study Guides: 1Vocabulary: 2MagnetismA magnet is any substance that attracts the element iron or anything with iron in it. Animals have adapted to feed on different types of food. Three major groups are the jawless fish, cartilaginous fish, and bony fish. When this happens, electrical energy is transformed into mechanical energy. A hurricane is an extremely large, tropical, rotating weather system that has sustained winds of at least 119 km/hr. Arthropods are invertebrates with external skeletons, segmented bodies, and appendages. Read more...iWorksheets: 4Study Guides: 1Vocabulary: 4Mollusks, Arthropods and EchinodermsFreeA molusk is an invertebrate that has an un-segmented, soft body that is almost always protected by outer shells. Read more...iWorksheets: 4Study Guides: 1Vocabulary: 9ElectricityCharged Particles. Read more...iWorksheets: 5Study Guides: 1Vocabulary: 7Sponges, Cnidarians and WormsUntil recently, people thought that sponges were plants. Plate tectonics are active on Earth since the very beginning. Reproduction begins when the pollen from the anther is in contact with the stigma. Snails, octopuses, clams, and oysters are all species of mollusks. Learn more how customers reviews work on Amazon The big ideas in Sixth Grade Science include exploring the life, earth, and physical sciences within the framework of the following topics: "Structures, Processes, and Responses of Plants" (structure and function of plants); "Structures, Processes, and Responses of Animals" (structure and function of animals); "Earth's Atmosphere and Weather" (atmospheric properties and processes); and "Conservation of Energy" (properties of energy, work, and machines).Studying and exploring spaceEdwin Powell Hubble (1889-1953) was an American astronomer who, in 1923, showed that the universe is expanding. Read more...iWorksheets: 4Vocabulary: 3Birds and MammalsA bird is an endothermic vertebrate that lays eggs, has feathers, and has a four- chambered heart. The waste substance itself is the pollutant. Eubacteria are single-celled organisms that don't have a nucleus. Read more...iWorksheets: 5Study Guides: 1Vocabulary: 3Earth's AtmosphereFreeThe Earth is unique in our solar system because it has an atmosphere that can support life. The oxygen is let go through the stomata and the sugars are used to power cell functions. External fertilization is when the female's eggs are meeting with the male's sperm outside of the female's body. Protists include some algae, paramecium, and amoeba. Read more...iWorksheets: 3Study Guides: 1Vocabulary: 1Work, Power & Simple Machines. Eventually the egg will be fertilized in the ovule that is in the ovary and turn from a zygote to an embryo inside the seed. The protons in an atom have a positive charge and the electrons around the atom have a negative charge. The placement of an electric current in a preexisting magnetic field can cause motion. This explains why an atom holds together. The characteristics are very specific and are applicable to all of the different species that exist on our planet. Read more...iWorksheets: 3Vocabulary: 3Protection, Reproduction and CooperationThe human body protects itself with non-specific defense systems that react naturally and automatically to invading organisms. Read more...iWorksheets: 4Study Guides: 1Vocabulary: 2Maps as models of the earth/Contour modelsGeologists use a variety of different types of maps to model or depict the three-dimensional Earth on a two-dimensional surface. There are three main types of passive transport - Diffusion, Osmosis and Facilitated Diffusion. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. Motor neurons carry impulses away from the brain and interneurons carry impulses within the brain and spinal cord. In most cases, water is a renewable resource. Rivers are closely interconnected and flow from higher to lower elevations where the water collects in larger and larger rivers until it ultimately flows into the oceans. An amphibian is a vertebrate that is ectothermic. All magnets have opposite ends or poles. Read more...iWorksheets: 3Study Guides: 1Vocabulary: 2Solids, liquids and gasesMatter exists in three different states or phases: solid, liquids and gases or vapors. Read more...iWorksheets: 4Study Guides: 1Vocabulary: 1Genetics - Study of HeredityHeredity is the passing on of traits from parents to their offspring, either through asexual reproduction or sexual reproduction, the offspring cells or organisms acquire the genetic information of their parents. Most amphibians live the beginning of their lives in the water. Read more...iWorksheets: 3Study Guides: 1Vocabulary: 2Introduction to earth scienceThe field of Geology includes a number of specialized disciplines including: Mineralogy - the study of minerals, Paleontology - the study of fossils, Petrology - the study of rocks, Geophysics - the study of the physics of the Earth and its atmosphere, Meteorology - the study of weather and weather prediction, Seismology - the study of earthquakes, and Volcanology - the study of volcanoes. Some of its properties are physical and would include such things as color, volume and weight. Nonrenewable resources are resources that, once consumed, cannot be replaced. Read more...iWorksheets: 3Vocabulary: 2 A natural resource that can be replenished is called a renewable resource. Read more...iWorksheets: 3Study Guides: 1Vocabulary: 4Earth's energy resourcesRenewable resources are resources that can be replenished in a reasonable amount of time. There are many structures within the cell. This is called the magnetic field. Your skin, with its layers of protective tissue, is a very strong, watertight barrier to environmental pathogens. A small weather system that has intense energy that creates heavy rains, high winds, and lightning is called a thunderstorm. The use of electrical energy to produce mechanical energy is the principle behind the workings of an electric motor. The fact that they take in food puts them into the animal kingdom. Read more...iWorksheets: 5Study Guides: 1Vocabulary: 1Introduction to matterMatter is anything that takes up space and has mass. Appendages are structures that are jointed and attached to the body. The structure of a sponge is very basic with some specialized tissue, but lacking organs and organ systems. The life cycle of angiosperms among the different species is very similar: Pollination, fertilization, and the development of fruit. Water accumulates in the cracks in solid bedrock and, at times, is a source of water. Read more...iWorksheets: 3Study Guides: 1Vocabulary: 1Earth's Fresh WaterFresh water moves over the surface by an interconnected system of streams and rivers. Read more...iWorksheets: 3Study Guides: 1Vocabulary: 4Moving and Controlling the BodyTissues are collections of cells of different types that interact to support the function of the tissues, organs and overall organ system. Each type of map serves a purpose because each type has its special strengths: Topographic Maps, Mercator Projections, Conic Projections, Azimuthal Projections. There are two types of active transport - Primary (direct) and Secondary (indirect). Even though solid rock like granite or marble has no pores, it often has a series of cracks and possibly faults. On the other hand, Mars has no atmosphere at all. The boundary or line delineating different air masses is the weather front. Lizards, snakes, turtles, tortoises, and crocodiles are all examples of reptiles. It also analyzed reviews to verify trustworthiness. Read more...iWorksheets: 5Study Guides: 1Vocabulary: 5Fishes, Amphibians, and ReptilesFish reproduce using external fertilization. By comparison, Venus has an atmosphere that is high in ammonia and other caustic gases; it is so dense that it would crush a human. Gases or vapors are influenced by three factors: temperature, volume and pressure. Read more...iWorksheets: 3Study Guides: 1Vocabulary: 2Groundwater ResourcesGroundwater is fresh water stored in regolith and bedrock. The brain and spinal cord communicate with all other parts of the body through the nerves that make up the peripheral nervous system. In addition, because of polarity, all magnets will point toward the magnetic north pole of the earth. Read more...iWorksheets: 4Study Guides: 1Vocabulary: 5Diversity of lifeThere are many characteristics that scientists use to determine if something is alive. These are referred to as the north and south poles. Read more...iWorksheets: 3Vocabulary: 3Plant ProcessesPhotosynthesis is a process powered by sunlight that uses carbon dioxide and water to produce oxygen and food. What is an Antigen? They attach themselves to a hard surface where they live out their lives. Matter can undergo both physical and chemical changes. The process requires six molecules of water and six molecules of carbon dioxide. Igneous rocks form when liquid rock cools and hardens. Your body relies on what you eat and drink to maintain healthy tissues and to generate the energy. A antigen is a molecule that immune system can recognize as either part of the body or as foreign to the body. Fossil fuels are ultimately a limited resource, it is important to develop and use renewable energy resources. Read more...iWorksheets: 4Study Guides: 1Vocabulary: 2Our impact on earthAny waste substance that is added to a natural system in amounts greater than that natural system can break it down or eliminate it is called pollution. Read more...iWorksheets: 2Vocabulary: 2Cells: The Basic Units of LifeThe cell is the basic building blocks of all living organisms. Read more...iWorksheets: 5Study Guides: 1Vocabulary: 4Cell TransportActive and Passive Cell transport. A mammal is an endothermic vertebrate that has skin covered with fur or hair, a four-chambered heart, a wide arrangement of teeth, and young that are born alive and feed by milk that was produced by the mother's body. These molecules undergo chemical changes and oxygen and sugars like glucose are produced. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. A reptile is a vertebrate that is ectothermic and has scaly skin and a pair of lungs. Prior to this, scientists believed that our galaxy was the entire universe. Electric charges are either positive (+) or negative (-). There are animals that eat only animals (carnivores), animals that eat only plants (herbivores), and animals that eat both plants and animals (omnivores). Small streams that feed water into larger rivers are called tributaries. When they are adults, they do not move. Sensory neurons carry impulses toward the brains and spinal cord. Read more...iWorksheets: 4Study Guides: 1Vocabulary: 4Six Kingdoms of LifeThe six Kingdoms are: Archaeobacteria, Eubacteria, Fungi, Protists, Plants and Animals. Planet Earth is home to 8.7 million species, scientists estimate. Read more...iWorksheets: 3Vocabulary: 3Providing Fuel and TransportationFood is stored and processed in your stomach, so that your body can gain access to the nutrients in the food. Animals are divided into vertebrates and invertebrates and include mammals, amphibians, reptiles, birds and fish. While the greatest magnetic force is at the poles, there is some degree of magnetism all around a magnet. Other properties are chemical and deal with how matter chemically reacts with other materials. Sedimentary rocks: Clastic, Chemical, Biochemical or organic. Because oil, natural gas, and coal are the products of plants and organisms, they are known as fossil fuels. Read more...iWorksheets: 5Study Guides: 1Vocabulary: 2ElectromagnetismThe production of a magnetic field around an electrical current is called electromagnetism. In 1990, the Hubble Space Telescope (clearly named in honor of the great 20th century astronomer) was launched by NASA and has provided some of the most spectacular images of the universe ever seen. Read more...iWorksheets: 5Study Guides: 1Vocabulary: 2Plant reproductionAn angiosperm is a plant that produces seeds within a fruit. Plate tectonics is a scientific theory that describes the large-scale motion of plates of the Earth's crust over hot mantle rock. A solid has a definite shape and volume, A liquid has a definite volume but no definite shape and A gas has neither a definite volume nor shape.

Learn everything an expat should know about managing finances in Germany, including bank accounts, paying taxes, getting insurance and investing. We offer free revision as long as the client does not change the instructions that had been previously given. In case a client want to alter the instructions, revision can be done but at a negotiated fee. We give 100% refund for an assignment that we ... email protected] bece cdh eab eae agha ebdf ba aaa qi gb aa ab fb jji bac nbic af aj cfbh aqm ee bd ddca caa eg pc jhgb rai efi cd fr Access Google Sheets with a personal Google account or Google Workspace account (or business use).
