FACETIME is the audio and video service and video call from Apple, providing voice calls and video cameras (including conferences with up to 32 people). As increased realty functionalities have been introduced, FaceTime offered fun filters and stickers that color and illuminate your conversations. The only problem with FaceTime is that it is not available outside the Apple's ecosystem. When 3G networks have been introduced, we have thought of video calls as a step closer to the Marty McFly 2015 once visited. But he required more versatile technologies, such as Apple iOS or ubiquitous Wi-Fi, to become real. And now we have it in our pockets. When downloading the FaceTime iPhone becomes a special type of device for video chats in a blocked circle. You can call anyone you listed in your contacts ... even if they are on Apple. The app offers much more than you look at a glance. It is time to face the FaceTime when you throw facetime on your iPhone, it looks very simple, a pony of a trick that can only transmit your videos and audio. It's very easy to start a call: Start the App Select with whom you want to talk (or from the call log or from all contacts, touching  + . Wait until the buttons Under the list they become active. If they do not remove in ten seconds, it means that the user does not have an active Apple device, so they can't respond. If they get green, press Audio or Video to start the call. Wait the other side. Respond. When the call starts, the screen looks free from any menu, all dedicated to the face of your partner. You just need to touch it to activate the menu. The functionality set is available depending on the device. Basic features include the Muting of the call or camera switching. If your device is rather modern (iPhone 7 or later), unlock some options, based on increased reality. All of them apply in real time and remain active until you spend them or I know Lost. Filters. Your image is processed in real time, looking to painting, design or an advanced video, in insta style. TE XT. If you need some data to be transferred (such as the phone number, e-mail, the exact time), or just to say something beyond your voice, you can simply write it in a text. The letters can be positioned anywhere on the screen and while moving your head, follow this time they look like Snapchat. Stickers. There is the set of original stickers with elementary actions (arrows, crowns, simple shapes), enriched by stickers from different sellers. DÅ~, a famous Game Castle Crush offers its own set of facetime stickers. Position on your face or on your head, or on your shirt, and follow your movements. All these processes require powerful implementations AI, so the functionalities mentioned in this FaceTime review may fail on devices with dated iOS, they may miss these features. As for us, it's the sign that your iPhone needs updating. FACETIME Mobile: if you miss it, you can't get it in the first Iphone Instagram years has been exclusive, and then it has become legal for Android devices and even Windows Phone. The ancient instagrammers sensations that would have from it are now delivered by FaceTime, something only for IELITE. But can you ever come out of the icage? No. If you are on the iPhone, you can afford the
