Save energy costs today and tomorrow with Rheem's ProTerra Hybrid water heater, offering unparalleled efficiency. Not only does it qualify for federal tax credits and local utility rebates, but it also provides long-term savings due to its exceptional up to 4.07 UEF rating. With advanced features like vacation mode and adjustable production, you can optimize your energy usage throughout the day. The ProTerra Hybrid uses a unique heat-pulling technology that reduces energy consumption by 75% compared to standard electric water heaters. Monitor your energy usage in real-time through weekly, monthly, and yearly reports accessible on your mobile device. Stay connected with EcoNet WiFi technology, which allows you to adjust water temperature, track energy usage, and set vacation mode from anywhere. Enjoy a sustainable lifestyle with ProTerra Hybrid's five operating modes - energy saver, heat pump, electric, high demand, and vacation - tailored to fit your daily routine. With its easy installation and serviceability, this hybrid water heater is designed for convenience. Plus, it boasts an impressive up to 87-gallon first hour delivery, ensuring plenty of hot water for the entire family. Rheem's ProTerra Hybrid makes sustainable living accessible and easy, with a self-cleaning mechanism that reduces sediment buildup and prolongs tank life. Based on comparisons with standard electric water heaters, this hybrid model offers significant energy savings and payback periods of two years or less. Rheem's ProTerra Hybrid Electric Water Heater is designed for enhanced installation flexibility with universal side and top connections. It features Heat Pump Technology that pulls heat energy from the air, making it the most efficient water heater on the market. This technology reduces carbon footprint by 75% compared to standard electric water heaters. The ProTerra Hybrid Electric allows for energy-saving and time-of-use scheduling, enabling homeowners to save money and energy by programming their water heater according to their needs. Additionally, it features a Vacation/Away mode that reduces temperature set points when hot water is not needed, further conserving energy. The water heater also comes with built-in Wi-Fi and EcoPort (CTA-2045 port), making it Demand Response Ready, allowing homeowners to participate in demand response programs and earn rebates. A LeakGuard Auto Water Shut-off Valve is available as an option, which limits leaks to no more than 20 oz of water. The ProTerra Hybrid Electric features energy use tracking, providing weekly, monthly, and yearly reports on energy usage from the EcoNet app. Operation modes include Energy Saving, Heat Pump, Electric-only, High Demand, and Vacation/Away, allowing homeowners to adjust settings according to their lifestyle. Advanced diagnostics are also available for plumbers, enabling them to view detailed alerts and alarm codes via the Rheem Contractor App.
