The Google Maps app is a free Android GPS for your phone or tablet. You can use the app to find places as shopping centers and office buildings and discover new places. Google maps uses a navigation system embedded with Google satellites to help you find predetermined places. Most Android devices already has the Google Maps app installed. However, not all Android devices do. If this is the case for you, download and install this app from Google Play or from any other App Store. Whether you are going to a new city or you need directions during the holidays, Google Maps will arrive in practice. Removed how you have an internet connection, you can get road directions to over 200 countries, 15,000 cities and get information over 100 million sites. It will be almost impossible to get lost. Google Maps uses real-time navigation, offering directions and transit information. Find petrol stations, restaurants, trend new places, nearby events and exciting activities. A, the facts of Google Maps and information is some navigation apps, such as Osmand, Maps (F Droid) and Hub Map. However, for a free app, Google Maps has more functions than most combined navigation apps. Google maps can trace and find local transport as trains, buss, driving bags and including real-time transit information. It is also possible to obtain relationships in real time on traffic jams, road closures and accidents. In addition, you can use the app to share your position with friends and family or make group trips easier. Also, you can create lists of all your favorite places or frequently visited destinations. Google Maps has an internal environment to help you surf in large places such as shopping centers and airports. You can also use the Street View function to quickly identify landmarks such as museums, shops, shopping centers and more. It also has a function of offline maps, so you can navigate without being connected to the internet.google Maps has a section where you can leave reviews for visible places to make it easier for others to decide where to go. You can also add missing photos, locations and roads to help you improve the app. With all available features, Google Maps simplifies you and others to navigate and find new places during the journey. Should you download it? Yes. If you like most people who always need directions, then Google Maps is for you. Google Maps is a powerful tool used by over 1 billion people, and over the years the app has become more efficient in suggesting paths, offering detailed options for public transport, points of interest nearby and much more . Google serves indications to drive, walks, cycling or public transit. When you select the Help option, you can ask Google to suggest a path that avoids tolls, highways or ferries. Similarly for public transit, you can choose your favorite transportation mode. Its transparent balance means that there are tons of functionality that are not immediately visible, and here is here that this guide is useful. If you are just starting with Google Maps or you are looking to discover new features the service has to offer, read. Save your home and job addresses Setting up an address for your home and work should be the first thing you do in Google Maps, as you give you the chance to quickly surf home or in the office from your current position. The choice of a personalized address also allows you to use voice commands for navigation as "home to home". How to save the house and the Work in Google Maps Guide to drive and drive directions for driving if you are driving a car, exploring a new property walking, cycling at work or using public transport, Google Maps has covered. You will be able to set the preferred shipping mode and select a path from all available options with facilities, with Google showing real-time travel information along with suggested shortcuts to avoid traffic. How to get directions and on foot in Google Maps See the Google Maps public transit times is a precious resource if you rely on the public public For your daily lunch. The service offers you a detailed list of transit options for your trip - if it is by bus, train or ferry - and offers the possibility of setting a starting time and see which structures are available at that time. How to use Google Maps for Public Transit Take offline maps if you travel abroad or pull in a position with limited Internet connectivity, a good option is to save that particular offline area so you can get directions and view points of interest . The saved areas expire in 30 days, after which you will need to update them to continue to surf online. How to use Google Maps Offline Add more stop for the path The possibility of adding more interruptions to the route is easily one of the best features to come to Google Maps. You can set up to nine stops along the path and Google gives you the overall travel time and any delay along the selected course. How to add more stops in Google Maps Share your current location Google Removed position Sharing from Google+ and reintroduced to map in March, offering an easy way to share your position with friends and family. You can send your intermediary for a certain amount of time, select approved contacts to share your position with, or simply create and share a link with information about the location in real time. How to share your position in Google Maps Book An Uber Google Maps allows you to book a Uber A € â,~ "along with LYFT or OLA, based on your position - without ever leaving the app. You will be able to see faults Tariffs for various levels, in addition to estimated waiting times and payment options. It is not even necessary to install Uber on your phone to use the service A € â,~ "you have the possibility of accessing the service from the maps. How to book a Uber in Google Maps Use Maps Maps Maps for guesses to find your favorite retail store within a shopping center or on the exhibition you are looking for in a museum. The service is available in over 25 countries and allows you to easily surf inside shopping centers, museums, libraries or sports places. How to use internal maps in Google Maps Create and share lists The possibility of creating lists is the most recent addition of functionality to Google Maps, and brings a social item to the navigation service. With lists, you can easily create and share lists of your favorite restaurants, make lists of easy-to-use places to visit when traveling in a new city, or follow a list of nursing seats. You can set public lists (viewable for all), private A €
