(Photo: Å Balazs Bercesenyi) Å Getty Images / Design by Dion Mills Some tattoo positions are considered more controversial than others, like on hands, face or lower back. But a position on the body has a useless stigma attached to it when it is inked: the neck. Because visible tattoos were considered non-professional, neck tattoos have earned a bad rap. However, precisely with any design or positioning, a neck tattoo acts as a means of personal expression. There are so many beautiful pieces of inspiration for the ink on your neck area, both small and delicate or something that is stronger and covers a little more surface ... many even even with the neck of some of the Greatest Hollywood celebrities. Among qualified artists and the most progressive attitude towards visible tattoos, getting a neck tattoo has never been a more welcome idea. So if you're thinking of obtaining one, scroll down to 13 tattoos of the fresh celebrity neck. 01 of 13 @lucyhale The first tattoo of Lucy Hale was this black ink ribbon on the back of her neck. In a 2012 interview with Maniac magazine, she said she took the piece of ink after a break that she wanted something rebel. Tattooed by the favorite celebrity Dr. Woo, the small bow is easily hidden by long hair or a high-necked shirt. However, Hale is known for her hair cuts Bort Bob, then the ink is normally exposed. Fortunately, the simplicity of design means that it will correspond to any aesthetic or style the actress chooses Rock. 02 of 13 @haileybieber hailey bieber flaunt not one but two-neck tattoos. First, you have a tiny cross on the left side of her. Bieber discussed her faith very than her during her career, and the little symbol of her was her permanent way to show her religious devotion. The second tattoo that has the word "lover" in a italic script, which the model has arrived in 2019. There is no real explanation for the tattoo, but many have hypothesized that the tattoo is related to Taylor Swift And his 2019 lover album. "Regardless, both pieces of ink make a statement" especially for a celeb like Bieber, who wears his hair pulled back a lot ... but it can also be hidden if necessary. 03 of 13 @ Kehiani If you are really looking for a neck tattoo and you are not afraid to show it, take a page out of Kehiani's book and go for a high-necked piece. Technically, the singer's neck sprinkled with different tattoos, but His neck seems to be covered with a cohesive piece when you look at it. If you are interested in a tattoo throughout the neck that a great statement, the key is to make the pieces mesh in some way, like using the same color of ink throughout, getting each tattoo in the same style, or having the same artist to each. 04 of 13 @bangbangnyc In January, Selena Gomez celebrated the release of her new album "RARO" by getting a tattoo of the album title on her neck under her ear. The tattoo is is is at a point that her hair can cover; However, because it is quite low, the ink will probably be visible since your hair has a lot of movement. The ink is delicate and knocks down, mimicking the angle of the lobe of the lobe. And because of the inclination, the tattoo disrupts the natural shape of the neck for greater impact. 05 of 13 @ @ Arianagrarande Ariana Grande has several tattoos and even made the headlines for her ink choices. This neck tattoo is a lesser known one, with the Great herself even underestimating the photo above Instagram, "I've always forgotten my lil tat." The singer's Script ink reads "Mille Tendende" (French for "Mille Tendende") and is a line from the movie "Breakfast at Tiffany's", which Grande called his favorite movie of all time. Even on the back of the star's neck, the tattoo always shines, considering that her hair is mostly in her signature pony. 06 of 13 @ dr woo. ZoÄf Å Kravitz is another star with few neck tattoos, including a "baby" tattoo on the right side, a "yes" on the back, and two sparrows on both sides of the neck. The "baby" piece is inked just below her jaw, which means essentially hidden by her own head when not extended (as in the Instagram photo). However, the other tattoos are slightly more visible and have made some appearances on red carpets. But since they are positioned on the back of the neck, they are easily hidden by clothing or long hair. 07 of 13 @ Model Sofia Richie does not have many tattoos "Unlike sister Nicole!" But those she made a great statement when shown. This side neck tattoo reads "clarity" in tiny block letters. The letters are also spread out quite a bit, giving the words a light and delicate look rather than making a major impact. Although the Word is inked on the side of the neck, it is not directly in the center, so it will remain mostly hidden by the hair, but let's peek at the right angle. This type of tattoo is somehow both intimate and public, making it particularly interesting. 08 of 13 Sanghyuk Ko Rita Now she has an "r" behind her left ear, but she also has another slightly lower piece on her neck. The cursive script, which reads "Zog", is a tattoo in honor of the singer's mother. "When I was younger my mom @ VeraoraÄe would call me her Zog Å™ Azogi moms ä™ She would have said, which means her little baby bird in Albanian", wrote Now in an Instagram caption. The script is tilted to mimic his jaw curve, but is otherwise minimal - when not hidden by the hair, the ink will attract attention without being overwhelming. 09 of 13 @Badgalriri Rihanna is another celebrity with an affinity for tattoos, including script ink left side of his neck. The singer obtained the tiny piece of ink in 2010, which reads "Rebelle Fleur" Å € ä,~ "which means" rebel flower "in French. What makes Rihanna's neck tattoo so unique is that the script himself is tilted, but the actual words are not, giving it a sense of movement despite the text is a so-static type of ink. 10 of 13. 13. Hahn Halsey another celebrity with a faint script tattooed on the side of her neck. Reading the lyrics, "I'm a loser child", which come from BECK's Song "Loser", are inked in a hot and curly cursive font. Since the tattoo is flat in the center of the side of her neck, it breaks the natural shape. This means that the design of the tattoo really opens up despite its delicacy and tiny letters. 11 of 13 @VanessaHudgens Vanessa Hudgens makes a big statement with a black butterfly tattooed on the left side of her neck. And although it's towards the back of his body, the big black ink and size make him out of his feet as if he were in front and center. Considering the ink is just a color, it doesn't feel overwhelming about the Petite Star structure. The natural movement of the butterfly only increases that of the neck itself for a teeming tattoo with a sense of movement. If you're looking for a piece of ink that makes a stunning pop, whether your hair is up or down, go for a blank design with some movement from the subject or from the tattoo itself. 12 of 13 @MileyCyrus Miley Cyrus got a little neck tattoo in honor of, well, herself! The singer has a small "92" on the right back of her neck in honor of the year she was born. "Year of the Monkey", reads the Instagram caption under a photo of the singer's new ink. The design uses medieval lettering to give the tattoo a little edge ... perfect for Cyrus. However, the ink also has a unique charm because it sticks with only the outline and does not fill the letters with black ink. Because of this, the tattoo feels minimal and delicate despite the use of thick block lettering. 13 of 13 @RuBiRose Although Ruby Rose doesn't have the ink anymore, she got a script tattoo on the left side of her neck in 2011. The design read "And breathing", the reference lyrics to the song of SIA "ti breathing." The actress-model and the singer are good friends, although her reasoning for the tattoo ä™ "Either for her friend or just because she liked the song" is unknown. Something extremely unique about the ink is that the inscription is in a style that almost looked like an ECG from afar, meaning the importance of the lyrics to the celeb.
