 33. Your favorite book or film?
 34. Your favorite song?
 35. What are the qualities of a good teacher?
 36. What are the qualities of a good student?

of the sentences below best

- i. the increased information in the
ed sentence in the passage? (incorrect)
Change the sentence in highlighted
bold and important information.
- ii. Mercury and Earth has a
similar density.
- iii. less dense than Mercury moves
closer to the Sun.
- iv. farther away from the Sun, so it
has density than that of Mercury.
- v. Mercury is closer to the Sun than Earth.

The closest planet to our sun and the smallest
in the solar system, Mercury is also one of the
least understood. Compared to more
glittering planets like Mars, Jupiter and
Saturn, Mercury has received much less
attention from scientific study missions. But
NASA's Messenger probe is set to reveal the
secrets behind the odd planet.

Mercury, due to its closeness to the Sun, is
not nearly as dense as the rest of the
Earth. The low core makes up most of the
planet's mass. The "density" of something is
measured by how much it weighs (or basically
its mass) per amount of space it takes up (its
volume).

The planet Mercury is so small and so close
to the Sun that it does not have any atmosphere.
Perhaps Mercury has no atmosphere because
of the weak gravity of the planet which
prevents any gases from getting trapped near
its surface.

Lastly, the surface of Mercury is smooth and
devoid of craters, which is strange because it
was long suspected that the surface had been
bombarded with space rocks and other fallen
debris. If we were to compare Mercury to
another planet, it could be compared to the
planet Mars, which is also smooth.

Background and aims of college/university research, academic and research departments. This topic has several dimensions of education and research. These include research and teaching, research and development, research and innovation, research and transfer.

The concept of research, teaching, and research and development. Research and development means the systematic process of investigation and the development of ideas, plans, data, theories, and other related items. This includes the need for innovation, and the application of new research. Research and development must fit into the context of the institution's mission and strategic plan.

Research, teaching, and research and development must support the mission and strategic goals of the institution.

Research and Development

Research

Academic research groups or disciplines contributing to research. What are academic research groups?

Research and development is the main responsibility of the university. Research is the basic component of the university's mission and research, teaching, and development, and it is performed with educational objectives in mind. Both basic and applied research are conducted in various fields and areas such as the basic sciences, social sciences, and applied sciences.

Research activities include academic research, research, and development, and research and development. Academic research is a systematic process of inquiry, planning, and analysis to gain knowledge and understanding. Research and development is a systematic process of inquiry, planning, and analysis to gain knowledge and understanding.

The basic research is the primary activity of the university. Basic research is the basic research and its basic research is conducted to achieve a specific goal. Basic research is conducted to achieve a specific goal. Basic research is the basic research and its basic research is conducted to achieve a specific goal.

Simply said, research is the basic research. Research and development are performed by basic research, which is basic research, and research and development.
