This approach cuts out a lot of mileage taking the most direct trail, located a few miles along the road from the school to the paragliding landing field. the short hike to the tiger side reminds the cable line: a narrow path ardent its way up as quickly as possible. Despite the rain, we were joined by many a hiker and more than a couple of Canadian companions as we switchbacked through the young forest. we have passed many paths less widespread branching; some reconnected back up with the main artery, while others disappeared intriguing in the distance. feeling adventurous, we took one of these paths on the way back down. Unfortunately, our explorations spit us out miles from the parking lot, forcing us on a walk along the unpleasant busy Issaquah-Hobart road to return to the car. the two landing fields offer a beautiful view of squak, cougar, and the lake of sammamish to the north-west, and mt. rainer to the south-east. take some time to admire the artificial grass track and what would mean to make a jump running in the air from here. Although moderately steep, this path is short enough to convince the whole family up, although the narrow path often becomes slippery with mud after prolonged rain. years ago, harvey manning decided to baptize the area in honor of sound poo the poo made by steam recording whistles. these same whistles presumably contributed to creating the large fields open up.
