

Kindle bluetooth file transfer

Continue

Sorry to interrupt CSS Error Send to Kindle for PC makes it easy to put content on your Kindle, whether it's a free ebook or a Word document. You can also email files to @Kindle.com or transfer them over USB, the old-fashioned way. Any documents you transfer over are stored in your Kindle Personal Documents online. When you buy a new Kindle, they'll be automatically restored. You can also access your personal documents from Kindle apps on other platforms. Send to Kindle for PC Amazon's Send to Kindle for PC app is the quickest way to get free ebooks and other documents onto your Kindle. After you install it, you'll find a "Send to Kindle" option in your right-click menu. You can quickly send documents to your Kindle without the hassle of emailing them or connecting cables. Send to Kindle for PC also installs a virtual printer — select "Send to Kindle" while printing and your document will appear on your Kindle. Email to @Kindle.com Before the PC app was released, the official way to send documents to your Kindle without connecting a cable was sending it to your @Kindle.com email address. Before you can send any documents, you'll have to set up your personal email address as an allowed sender. First, open the Manage Your Kindle page on Amazon's website and click the "Personal Document Settings" link under Your Kindle Account in the sidebar. Click the "Add a New Approved Email Address" link and add your email addresses to the list. Only addresses on this list can send documents to your Kindle. Once it's added, you can email documents to your Kindle at the address that appears on the page. Warning: Documents sent to your @Kindle.com address may be delivered over Whispermnet. Amazon pays wireless carriers for this service and charges a fee for Whispermnet delivery. You can email documents to @free.kindle.com instead of @kindle.com to ensure they're delivered over Wi-Fi, which is free. Managing Your Kindle Personal Documents Documents sent to your Kindle using the Send to Kindle app or the @kindle.com email address are stored online in your Kindle Personal Documents library. When you get a new Kindle, they'll be automatically downloaded to your new Kindle, just like you purchased ebooks. You can view and manage your Personal Documents library on the Manage Your Kindle page. Just click the "Personal Documents" link in the sidebar. Use the Actions button for a book if you want to delete it from your library or redeliver it to one of your Kindle devices. Transferring Over USB Transferring files to your Kindle doesn't have to involve the cloud. After connecting your Kindle to your computer with its USB cable, you'll find it available as its own drive letter in the Computer window. Just drag and drop ebooks and other documents to the Kindle's Documents folder. If your Kindle supports audio, you can also place music and audiobooks into the Music and Audible folders. Documents transferred to your Kindle in this way won't be stored in your Kindle Personal Documents library or automatically transferred to your new Kindle. We've also covered some ways to send files to your Kindle from your browser. Check out the Kindleability bookmarklet and the Send to Kindle extension for Google Chrome if you're interested. At the moment, this process only works with Kindle devices and the Kindle apps for iPhone, iPod and iPad. Amazon promises support for Kindle Cloud Reader, Kindle for Android and other platforms in the near future. Something went wrong. Wait a moment and try again. Jeannie has been writing online for over 10 years. She covers a wide variety of topics—hobbies, opinions, dating advice, and more! It's easier than you think! Canva Transfer Files From Your Kindle Congratulations if you just bought your first Kindle Fire. For many of us, this is our first experience with a tablet. It is also a first e-reader for many folks, too. When you start to use your new Kindle Fire, it might seem overwhelming learning how to use it. Even getting the Wi-Fi to work was a bit of a challenge for me since I've always had just a desktop. However, as time passes, it becomes easier to use the Kindle Fire. Now that I've downloaded apps, music, and videos to the device, I have a strong desire to transfer some of these items to my computer. So how do you transfer your files from your Kindle to your computer? It is actually quite simple! Jeannieinabottle Use the Amazon Cloud The first suggestion I have for you is a simple one. If you are buying all your apps, music, movies, and books on Amazon, Amazon automatically saves it in the "cloud," and you can simply login on your computer to Amazon and transfer everything that way. You don't even need to hook your computer up to your Kindle Fire. However, many people prefer to simply hook the Kindle Fire up to the computer. Not only can you transfer your files from your Kindle Fire this way, you can also transfer files from your computer to the Kindle Fire easily, as well. You are simply going to need a USB cable that works with the Kindle Fire. Jeannieinabottle Connect the Kindle With a USB Cable The type of cable you are going to need to connect the Kindle to your computer is specifically designed for the Kindle Fire. Amazon sells it on their site for around \$6. The cable is called "Amazon Basics USB Cable - 2.0 A Male to Micro B." Search for "Kindle Fire USB Cable" on Amazon's site. Once you have the cable, it will be easy to transfer files. Hook the Computer and Kindle Fire Together This may sound pretty basic to some, but just in case, let me explain how to actually hook the computer and the Kindle Fire together. Once you have the cable, take the larger end of the cable and connect it to the USB port on the computer. Many computers have this on the front of the computer now. You may have to turn the computer around to find it in the back if you have an older computer. If you ever download photos from your computer to a camera, this is going to use the same USB port. Once you've hooked the cable to the computer, the smaller end goes into the Kindle. This plugs into the same place where you would plug in the cord to charge the Kindle. Once you've got the two linked together, you will be able to transfer files from one to the other. Jeannieinabottle Now You Are Ready This is all! Once the Kindle is connected to the computer, the Kindle's screen will show a "You can now transfer files to your Kindle" message. Your computer will likely recognize the Kindle and you can click on that icon in the "My Computer" screen to open the files. You will be viewing everything on your main computer monitor to transfer files to and from the computer and the Kindle. You can use a drop and drag method to put files on your computer from the Kindle. You can also use the drop and drag method to move files from the Kindle to your computer. Keep in mind when transferring files that your Kindle can only hold a limited amount of files. You do not want to clutter your Kindle with too much and use all the space. Also, remember the Kindle Fire only plays MP3 files. If your music is saved in WMA format (which is the case for me), don't bother transferring that music to the Kindle; it will just take up space and you won't be able to play it. The good news is, your computer should be able to hold anything the Kindle Fire has saved. This is an excellent way to backup all your files. This is also a good idea for anyone that has more than one Kindle in the household. Files can be shared amongst everyone by transferring them to the computer and then transferring them to a different Kindle. You'll have plenty of options and the \$6 Kindle Fire is in the Amazon MOBI or AZW3 format, you don't need the cloud to send eBooks on your Kindle. Simply connect your Kindle device to your computer and look for the Kindle drive in your Windows Explorer or Mac Finder. Once located, simply drag-and-drop eBooks into the documents folder on the drive. That's it! Should you need to convert your eBook from EPUB to MOBI or AZW3 first, check out our article on How to convert EPUB to MOBI or AZW3. USB Drive Mode Windows Explorer Mac Finder 2. Send to Kindle from your desktop If you'd like to simply click on an eBook and send it to your Kindle from the desktop, Amazon provides Send to Kindle for PC and Send to Kindle for Mac. With the native app installed you can send documents from the Windows Explorer or Mac Finder using right-click or control-click, as well as print to "Send to Kindle" from any Windows or Mac application that supports printing. Once you've selected your files, you can modify the titles and authors of the documents and select the destination device. Remember that not all document types are supported, however, as well as supporting MOBI, AZW3 and PDF files, the app is able to convert DOC, DOCX, TXT, RTF and some common image files types to the Kindle format before sending them. 3. Send to Kindle from your browser Send to Kindle for Google Chrome and Send to Kindle for Mozilla Firefox provide convenient ways to send blog article and other web content to your Kindle. As well as sending entire web pages, you can send just the selected text in your browser. In addition, using the Preview & Send option from your extension or add-on menu, you can edit the title and author of your document before sending it. Your content will be delivered by WiFi (free) or Amazon's Whispermnet (charges may apply), depending on how you setup "Send to Kindle" delivery settings. 4. Send to Kindle using e-mail To send MOBI, AZW3, DOC, DOCX, HTML, PDF, TXT, RTF and common image formats to your Kindle via e-mail, you first need to register an approved personal document e-mail list in the Personal Document Settings section of the Settings tab of your Manage Your Content and Devices page. This is to prevent spam by ensuring that your Kindle only receives documents from your authorized e-mail addresses. Next, you'll need to locate the unique e-mail address assigned to each of your Kindle devices under the Send-to-Kindle E-Mail Setting section on the same page and tab. To be successfully delivered, an e-mail can contain up to 25 attachments and can be sent to up to 15 distinct approved email addresses. Also, the combined size of your attachments should not be more than 50 MB, although you can send an automatically decompressed ZIP file. Amazon has published a Using Your Send to Kindle Email Address help page and the following short video provides some simple instructions for setting up this service. 5. Send to Kindle from your iOS device If you have the Kindle app installed on your iPhone, you'll see a Send to Kindle option in Safari's share menu. Tapping the button allows you to modify the title and author and choose the delivery device, just as with browser and desktop options above. 6. Send to Kindle from your Android device Lastly, Amazon also provides a Kindle for Android app in the Amazon Appstore for Android. Once downloaded and installed on your Android device, choose one of the share buttons found in Android apps that support sharing and then tap the Amazon Send to Kindle in the share menu to send the document to your Kindle device. All of these different ways to send eBooks to Kindle require a little work, but once you've set up your preferred option once, you will be able to send almost any document or article to your Kindle with just one click. That means that whenever you have your Kindle with you, you'll have plenty of articles available to read and enjoy. Want to know how to listen to audio books on your Kindle? Click here for a comprehensive list describing all your best options for listening to audio books on your device. Explore thousands of free audiobooks and ebooks at digitalbook.io. *Digitalbook is a participant in the Amazon Services LLC Associates Program, an affiliate advertising program designed to provide a means for sites to earn advertising fees by advertising and linking to the Amazon LLC marketplaces.
