Hair Defined replaces the textures of vanilla hair, eyelashes, eyebrows and beard for FFXIV forever breed and gender.Hair Defined was created and developed in collaboration with my wife Sofie, alias Dricent. Hair Defined is thought to be a "must have" for any FFXIV fan who wants to dive into some basic modding.»Hair Defined defines changes the textures of the vanilla hair of the game in areas with high population density there is a minimum performance degradation, but there is no need for 24 man raid.4GB VRAM GPU, 8GB system RAM and an HDD capable of maintaining up to 4mbps (read more). HDDs slow down the game by not being able to load these textures fast enough and the game goes crazy. The lack of VRAM or RAM will cause performance or crash problems. Before an update to FFXIV, make sure you back up your mods and use the help "Start Over" button to clean the index for the next update. It's a good idea to do so every time there is an update or even server maintenance. Don't do this could corrupt index files and in worse cases force a re-download of the game to solve. [DX11 Crashing]Disable all mod.hello» > >"Start Double confirm that the game functions on vanilla. The indices may have been damaged. [If the indices are damaged]= Find the most recent clean indexes from TextTools Discord or completely download the game completely. (Always make manual backups, don't always let TextTools do it for you.) [If the game works]= Proceed to install the Hair Defined package as you prefer. After checking "Help"> A search for trouble" If all right, you can continue to install all the changes you had or simply play the game. If mistakes persist = ??? I have no idea that it can be a mistake with TextTools or that the download has been damaged. A à À»Jscaria the main file. TEXTTOOLS and make sure you go through the configuration and backup process of your index files. (Automatically from TextTools) to the inside of TextTools Click on the «Mods» button at the top left and then on «Import ModPack»Find the .ttmp2 and open it. You will be shown an import screen to confirm the files to be imported. Go through the options as you wish and read carefully. It should be easy. Once you start to import the selected files. Congratulations! I mod / s are installed. Feel free to turn on the game and have fun ~ What is the point of this mod exactly? A à À»The purpose of Hair Defined is to correct mistakes, offer a better graphics and try to correct the artifacts A Pixelation "that that tend to get. An example of this horrible artifact is shown here. You can banned for this? No. Client-side changes are not detectable from Square-Enix at all. Publishing and publishing modders should use this instead of the Hair Defined 2K Hairfix! outdated, huge and generally looks worse. Please check the comparisons in the previous update. I think I found a broken texture. How can I help with that relationship? If possible take a screenshot and mail report on the page with a link to it. I can determine what hair is from there. My game crashes on startup. Consider visiting TextTools or the XIV modding discs. We have a lot of members to help, alternatively follow the Uninstall process above and try again. Do you have a Discord? Yes, press the Discord button at the bottom. Can I help you with a donation? Yeah, look at my wife and daughter's page. SQUARE-ENIX for publishing and creating original textures and FINAL FANTASY XIVNVIDIA for their AI DeepLearning API and Dricente technology to assist in the development of the methodology of this mod series, Assisting in importing, exporting and converting textures and more.
